SUBSCRIPTION RATES, TERMS, ETC.

Our most active customers will receive our bulletin automatically and free of charge. However, collectors interested in highly specialized areas and those who may order only infrequently are asked to subscribe, as are those who want the bulletin by air mail. The names of non-subscribers may be removed from our mailing list at any time without notice. Annual subscription rate in the United States, Puerto Rico, Canada and Mexico, as well as APOs and FPOs, is $2.00 by regular mail or $5.00 by air mail. Air mail to any other part of the world is $7.00 per year. We do not recommend surface mail for foreign subscribers.

HANDLING CHARGE is 25¢ for all orders under $5.00. Texas sales tax is 3% and must be included by all Texas residents except dealers who must furnish us their tax permit number. All prices quoted are in U. S. funds.

SPECIAL SECTION ON

PORTRAIT & PILLAR COINS

The 2nd Edition of PILLARS & PORTRAITS by ROBERT P. HARRIS is now in stock. It is a great improvement over the first edition--it has more pictures and more information but most of all, it was set in type (instead of being lithographed) which greatly improves readability. However, the price remains the same--$5.00 postpaid by surface mail. No collector of Spanish-American colonial coins should be without it.

A very limited number of copies of the FIRST EDITION of PILLARS & PORTRAITS have become available through an European dealer. We ran out of the first edition many months ago and no copies could be obtained then, even through Mr. Harris. This is not a reprint; these are part of the original printing of 2475 copies. This is already a rare collectors item and is bound to appreciate in value. Complete your library set now as we don't expect to ever again have this first edition in stock when this group is sold. Brand new copies, and only $6.00 postpaid.

The "H" numbers below are the numbers from Harris' book; the coins are listed in the same sequence as the book. Crown-size coins are listed elsewhere in this bulletin under the heading, EIGHT REALES AND PESOS OF THE NEW WORLD.

COLLECT COINS FOR PLEASURE AND PROFIT

EIGHT REALES AND PESOS OF THE NEW WORLD

Collecting crowns of the world was popular long before collecting minor coins was. We have always maintained a large stock of crowns, especially Latin American crowns. Our current offering below includes many, many new arrivals.

Crown-size coins of Latin America are listed in this section in the same sequence and by the same numbers that appear in the book. "EIGHT REALES & PESOS OF THE NEW WORLS" by Carlos Elizondo, Jr. This book contains a wealth of information on this subject and represents the most original research in this field since Wayte Raymond's first edition in 1939 of "Silver Dollars of North and South America." Unlike Raymond, however, Elizondo lists all coins by dates, mint marks, assayers' initials, varieties, etc., and prices them in four grades of preservatin

Elizondo's book is nearly sold out and will not be reprinted; we discontinued selling it wholesale several months ago. Now our stock is down to just a few copies, which we will continue to sell at the retail price of $6.50 until the stock is completely exhausted. This may very well be the last time we are able to offer it for sale; if you have delayed ordering a copy, time is running out on you.

The first number on the left below is the number. (in numerical order for each country) from Elizondo's book; the second or right had number (the "E" number) is the Elizondo type number from the book.

MEDALS OF MEXICO

MEDALS OF THE SPANISH KINGS
by Frank W. Grove

A new book on Mexican numismatics, the first in a trilogy covering the Proclamation pieces and medals of the colonial era and the Republican period of Mexico will be of interest not only to collectors of all phases of Mexican numismatology and to historians in general.

The author, a native Californian, has specialized in collecting and studying Mexican medals. He has personally viewed, studied and photographed most of the medals in this book. He examined and photographed the medals in the collections of the "Banco de Mexico", the National Museum at Chapultepec, The American Numismatist Society, and most of the important private collections of these medals. He studied all available numismatic books and auction catalogs including those of the Medinas, Herrera and Perez-Maldonado collections.

Volume I will have a hard green cloth cover and will be followed by a white book Vol. II, on the medals of Iturbide through Maximilian, inclusive. This will then be followed by a red book, Vol. III, which will list Mexican medals of the past century, viz. 1867 to date. The three books, when placed side by side, will form the national colors of Mexico, i.e. green, white and red. All medals listed are numbered and evaluated by the author and both sides are illustrated; the pictures on this page are actual samples from Vol. I of approximately 200 pages, 7 3/4" x 10 1/2". We are exclusive distributor for the United States.

REVIEW ON BOOK - MEDALS OF MEXICO - MEDALS OF THE SPANISH KINGS - by Al Almanzar

Works of famous scholars such as Adolfo Barrera, Jose T. Medina, Perez Maldonado, Alejandro Rosa, and others have been researched and additional information has been added to compile a time-taking and painfully researched meritorious book entitled MEDALS OF MEXICO-- Medals of the Spanish Kings. The author of this book, Frank W. Grove, a native Californian, has specialized in collecting and studying Mexican medals and proclamations for about five years. During that time, he has personally reviewed, studied and photographed most of the medals and proclamations listed in this book. He examined and photographed the medals in collections of the "Banco de Mejico" in Mexico City, the National Museum of Chapultepec, the American Numismatic Society in New York City, and most of the important private collections of these medals. For years he has traveled extensively and repeatedly in all of the states of Mexico searching for additional material for his book. In 1968 he visited and made notes of the "Archivo General de Indios" in Seville, Spain. In addition, he has studied all available numismatic books and coin catalogues. The author estimated that the book is at least 95% or better complete, so thorough has been his research on the subject. The book covers the era between 1701 and 1821 including the geographical area which was Mexico during those years. This includes Florida, New Mexico, Guatemala, Honduras, El Salvador, Nicaragua, and Costa Rica (529,017 square miles of New Mexico was transferred to the United States in 1848, and Florida was ceded to the United States in 1819). Six different reigns from Felipe V to Fernando VII are all covered in the book in alphabetical order by cities or states.

All medals listed are numbered and evaluated by the author, and both sides are illustrated. Although the book is written basically in English, the author refused to translate the names of the Spanish kings. Some rough translations have been made in the inscriptions of the medals. These translations are given to aid the student with little or no command of Spanish or Latin language. The author feels that it will be inane to translate Carlos III to Charles III when one can look at the picture of the medal and read, "Carlos III." The author feels that for many years there has been much unnecessary and sometimes stupid translations of persons, names and places. "Jorge Washington" for "George Washington" and "Rio Grande River" for "Rio Grande" are two examples. The author refuses to be a party to continue this practice.

Mr. Grove first became interested in the subject after purchasing one of these Mexican medals and was later told that it was a counterfeit. Ever since, the whole thing became a challenge to him, and he is now the proud owner of at least 600 different Mexican medals, the majority of which date since the Mexican independence from Spain, including the empire of Agustin de Iturbite and Maximiliano y Carlota.

Although pricing is included in the book, Mr. Grove feels that most of these medals and proclamations may be considered rare, and the price of the medal is what the owner will ask and what the prospective buyer will pay. He also feels that with ever increasing interest in this field, the prices will be meaningless in a short time. He further warns against counterfeits. He feels that his book will probably encourage more counterfeiting and that asking for a medal's pedigree will help keep any counterfeits off the market.

The book has a hard, green cloth cover, It contains 204 pages, sized 7 3/4" X 10 1/2", close to 4000 photographs of different medals and proclamations are shown, and including the different medals and varieties, at least 500 different medals are listed. The book has been printed in glossy paper, stock Fasco #80-coated, green cover with gold printing. 1,100 numbered copies are available-- 400 for distribution in Mexico and 600 for distribution in the United States.

Exclusive distributorship has been given to Almanzar's Coins of the World, price per copy $12.50. Dealers are requested to inquire about wholesale prices.

The following letter received may be the best testimony of the quality of this book.

Gentlemen:

Please send me a copy of Medals of Mexico, Vol 1, by Frank Grove.....
You might be interested to know that my wife is assistant to Mr. [illegible], Bibliographer of the Los Angeles Public Library, and it was upon her recommendation that your copy was ordered. When it arrived she was so favorably impressed that we decided to order a copy for our personal library, as our coin collection specializes in the Colonial period of Mexico.

Very truly yours, Peter E. Brander

BRITISH WEST AFRICA

The Coinage Of British West Africa

by
Alredo F. Almanzar

Our book of the above title has finally rolled off the presses, after 2 years in preparation. Years ago, I began investigating the scarcity of these coins when I would notice that when I offered certain types, dates or mint marks for sale, I would be flooded with orders for some of them while others would not sell at all. I realized that mintage figures were not reliable indicators of the rarity of coins.

I began a survey of the actual availability of these coins, as a basis for writing a book. For over 2 years, I researched the series and kept accurate records of this research. This

BRITISH WEST AFRICA (CONT)

was the basis of the prices in this book, together with advice and assistance of several advanced collectors. Now the results of all this labor are available to you in a 45 page book.

All type coins are illustrated and all dates and mint marks are priced in six grades of preservation. Also included are sections on proofs, mules, counterfeits, mints, etc. It is now in stock for immediate shipment at $2 per copy postpaid. Dealers please write for quantity prices.

"The Coinage of Haiti" by Carmen Arroyo is as far as we know is the first attempted to show a deep study of these enteresting series in recent times. The book shows cross-reference to best known publication, but the author gives also his own type numbers and a code for each single date, such as Yeoman and Craig Numbers. Illustrations are shown and specifications of the coinage are given, along with evaluations for four different grades; ussually those in which coins are most likely to turn up. Also a section has been devoted to patterns and provisional issues; 64 pages in all.

We hope to have it printed within 30 days if not sooner. Price per copy is $2.50. Dealer please write wholesaler's price.
